VARIABLE WORK TIME

A SELECTED BIBLIOGRAPHY, PARTIALLY ANNOTATED

During the past decade a new concept concerning rearrangement of work hours has gained momentum. As an import from Europe U.S. businessmen are taking a close look at continental counterparts, eager to gather information aiding in its implementation here.

The approach varies, as well as the nomenclature; 'gliding time', 'flexi-time', 'dynamic worktime', '4-day-40-hour-week' are being discussed by management, employees and labor unions. The news media, principally newspapers and periodical journals, are reporting the pros and cons; a few books have been written on the subject, and some legislation has been introduced. The need for a selective bibliography to gather some information sources became apparent. A small number of citations have been annotated to aid in the selection of pertinent materials.

To facilitate the user this systematic bibliography is grouped according to country of origin; citations are then arranged in alphabetical order by main entry.
